

Constrained HSI body readout: protection succeeds; mean gain is concentrated

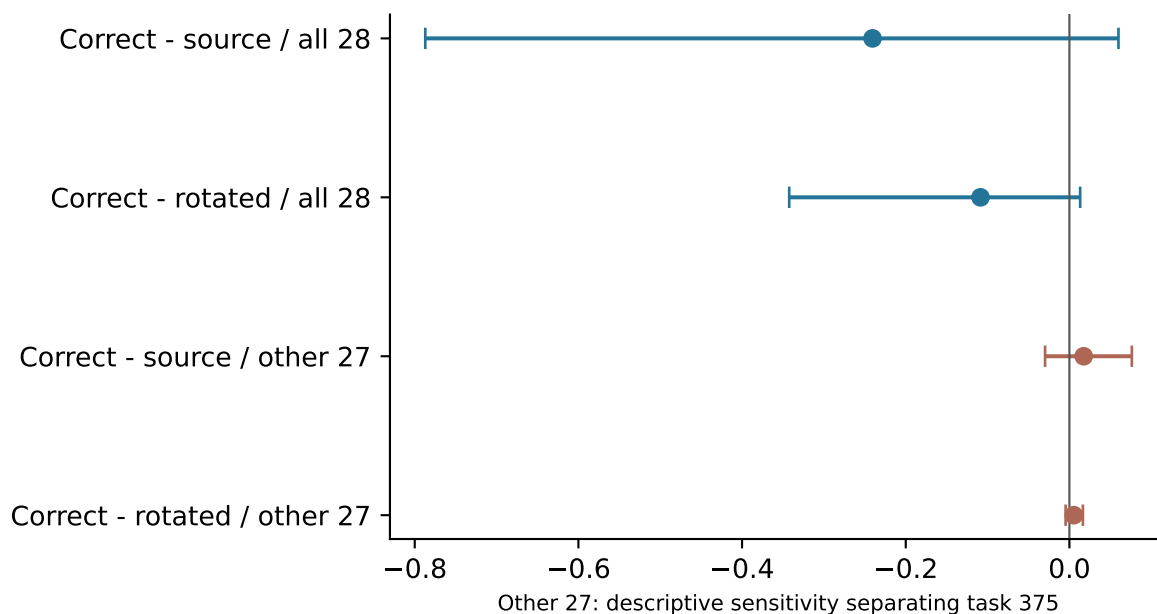

Native HS: all 28 tasks (lower)

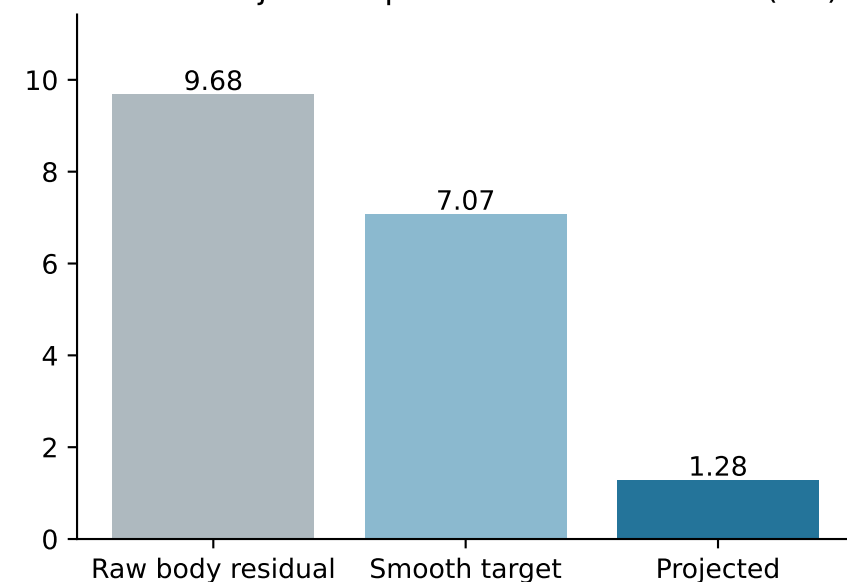

Engagement and fixed-floor support (%)

Paired HS deltas: task 95% intervals

Native 28-joint displacement from source (cm)

28 development tasks; two paired targets averaged. Correct beats rotated on 8 tasks, loses on 16, ties on 4. Task 375 dominates mean HS gains.
